## John Deere's Self-Dump Sulky Rake

The First Consideration Has Been Simplicity and Durability!

#### DURABLE

Axle studs are 1 1/4 inches in diameter, and are reversible and interchangeable, which doubles their life.

Dump rods are of high carbon steel, 3/4 of an inch in diameter. They have four times the durability of the ordinary dump rod, as they are reversible individually, interchangeable and again reversible.

#### SIMPLICITY

We can rightfully boast that our rake has fewer parts than any rake on the market. Simplicity of construction and proper material, systematically and symmetrically distributed, mean much to users.

#### ITS GOING TO BE SOME DOG FIGHT

(Dover News.)

The advocates of prohibition who desire to see liquor voted out of Mason County have been busy for the past week circulating petitions for the calling of an election to give the citizens a chance to decide the matter. More than sufficient names were secured to insure the calling of the election, and these petitions were filed with the County Judge Wednesday. The election day will be set and one of the warmest fights ever waged in Mason County will stir things up for the next thirty days. Both the wet and dry advocates are claiming an easy victory, but both are rolling up their sleeves and spitting out of the corner of their eye, which forebodes a lively scrap, and the chances are that a good-sized patch of woods will be tramped down before the final count. Maysville is the only wet spot for many miles along the northern borders of the State and an army with mops are bearing down upon it.
